WORK EXPERIENCE

Jr Support Engineer

SeekaHost Ltd, Coimbatore

September 2023 – September 2024

- Solved **Errors through Tickets** as a priority tasks on daily basis.
- Worked on the price changing parts for Domains in each & every portal of SeekaHost.
- Performed **Website Backup** from Storage server to Local server and termination of Overdue Website every month based on the billing cycle.
- **Server Migration** - Upgraded the Servers for new operating Systems with the procedure of moving the hosted websites out of the server and bringing it back once the upgrade is successfully completed.
- Executed Tests on various control panels and Operation Systems.
- Took Part in **Testing Ansible, Jenkins** in WHM for Integration.
- Connected with clients regarding billing related queries, issue and provided solution for the reported issues.

ROLE AS L1 SERVER ADMIN

- Managed and monitored 30+ WHM and Webmin servers, enduring optimal performance and uptime.
- Set up Nagios Core to monitor WHM servers, enduring real-time tracking of server health performance metrics and system alerts.
- Executed timely server migrations, backups and upgrades to ensure robust disaster recovery and achieving 100% success rate with minimal user impact.
- Strengthened server security through firewall management. managing immunify 360, SSL/TLS certificates and IP blocks; reduces unauthorized access attempt by 40% and enhances overall system integrity.
- Successfully identified and addressed abusive, phishing and copyrights infringement content reports on client websites. Conducted thorough investigation to gather evidence and communicated effectively with clients to facilitate prompt resolution.
- Handled incident response by investigating classifying issues and escalating critical problems to senior management and providing detailed reports on incidents.

IMPLEMENTATION

- Implemented **Vesta Panel** and **Hestia Panel** for VPS and dedicated Server. Provided configuration as per the Client requirement while ordering Packages with Control Panel .
- Implemented **Next cloud** in SeekaHost.ltd for the purpose of uploading files and folders into cloud.

CONTRIBUTION TO THE ORGANISATION

- Crafted Blogs on the topics : Next Cloud, PHP MyAdmin, IP Reputation, Ansible Playbook and Roles.
- Trained New Joiners by sharing knowledge on Ticket solving, Web Hosting, Server Migration and monitored their Hand-on with the allocated tasks.
- Provided ideas and planning on new implementation in Group discussion.
- Videography - SeekaHost You tube Channel

ACHIVEMENTS

- Led collaboration with the **HubSpot marketing** team to integrate automation tools & marketing strategies into the company's web hosting platform. Secured an exclusive premium featured free trial to conduct test case.

IMPROVEMENTS

- As a fresher got strong knowledge on Domain Configuration and hosting within short period and enhanced my skills in the areas of solving Server (WHM), WordPress and cPanel related errors.
- Interaction with clients and email communication.
